DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is too long as it comprises more than 150 words. Correction is required. See MPEP § 608.01(b).
2. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

Allowable Subject Matter

3. Claims 1-9 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

While it is known in the art to provide an anaerobic tank containing anaerobic granules and an aerobic tank containing aerobic granules, wherein each tank contains an agitator (see, for example, US Pat No 5,885,460 to Dague et al.) and it is known to direct supernatant from an anaerobic tank to an aerobic tank (see, for example, US Pat No 5,599,451 to Guiot), in the examiner's opinion, the prior art fails to teach or fairly suggest directing the supernatant to an indirect aerobic tank and directing a solution from the aerobic tank to the anaerobic tank containing aerobic granules.

Art Unit: 1724

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.
